MATLAB GUI ASSIGNMENT – Due December 2

For this assignment, you are to create a GUI that can be used to calculate a student's grade in a class. The GUI must meet the following criteria for full credit:

1. Include panels, static text and text input
2. Allow for the input of 5 assignment scores
3. Include a pushbutton, that when clicked will calculate the students' percentage score in the class as well as the associated letter grade.
4. Dynamically show the percentage and letter grade when calculated.
5. Use 2 different font sizes
6. Use 3 colors
7. Use dot notation in addition to the handles structure used by the GUI.

Submit all code and the figure to github.
